### MISSION CRITICAL ITEMS

Mission Critical items, highlighted in orange, shall be stocked at a minimum of 100% of the indicated amount upon any departure. Failure to meet this criterion constitutes a Category 1 medical deficiency. MOC Health Services shall be notified if the on board inventory falls below 100% during any voyage.

### MISSION ESSENTIAL ITEMS

Mission Essential items, highlighted in yellow, shall be stocked at a minimum of 50% of the indicated amount upon any departure. Failure to meet this criterion constitutes a Category 1 medical deficiency. Meeting this criterion while counting expired medications constitutes a Category 2 medical deficiency. MOC Health Services shall be notified if the on board inventory falls below 50% during any voyage.

### DIVING MISSION ESSENTIAL ITEMS

Diving Mission Essential items, highlighted in olive green, shall be stocked at a minimum of 50% of the indicated amount upon any departure that requires a hyperbaric chamber. Failure to meet this criterion constitutes a Category 1 medical deficiency.

### MEDICAL CLASS A ONLY

Medical Class A only items, denoted with an asterisk (\*), shall only be stocked on Medical Class A ships. Medical Class A ships have a USPHS Medical Officer and at least one Medical Person-in-Charge (MPIC) assigned to the ship. Medical Class B ships have at least two MPICs assigned to the ship. Medical Class B zeros (0), highlighted in gray, shall not be stocked on the ship.

### REFRIGERATION REQUIRED

Items highlighted in aqua blue shall be stocked in the medical refrigerator. Refrigerator temperatures must be between 33°F and 41°F at all times.

OMAO Health Services may need to substitute medications included on the NOAA Fleet Formulary and Medical Inventory without issuing a formal revision of this document due to recurring medication shortages and/or significant changes in medication costs. The RDHSs will collaborate to determine needed substitutions and will provide the ships instructions for alternate medication use if needed.
