

October 2020

## Small Boat Program Inspection Bulletin 01-2021

### What's New

1. **Class III and SRV Annual Inspection Book** : This document has been updated to reflect the newest requirements from the Small Boat Standards and Procedures Manual V4.1 and can be found on the [SBP Website here](#).
2. **Class A, I, and II Annual Small Boat Evaluation/Small Boat Examination (ASBE/SBEX) Form** : This document NOAA Form 57-19-01 has been updated to reflect the newest requirements from the Small Boat Standards and Procedures Manual V4.1 and can be found on the [SBP Website here](#). Remember to always go to the SBP website for inspection forms as they are updated from time to time and will always be the most up to date.
3. **Small Boat Hull Registration Number Request Form**: This document NOAA Form 57-19-03 has been updated and mirrors information now required in the [Vessel Management System \(VMS\)](#). Use this form whenever acquiring a new vessel or when a new NOAA number is required.

### Inspection Updates

1. Annual Class III and SRV onsite Inspections continue to be postponed. In the interim, self-inspection using the Class III and SRV Annual Inspection book continues. After a successful self-inspection and reporting out to the SBP Inspector, 90 day extensions are being granted. This will continue until further notice.
2. ASBE Inspections are still required for Class A, I, and II small boats. Triennial and Biennial SBEX's are to be completed by local Marine Surveyor's or may be deferred due to lack of local availability. Contact your LOSBO or the SBP Inspector if you are running into difficulty getting these completed.
