

December 2021

Small Boat Program Training Bulletin 01 - FY 2022

Recommended vs Required Training

1. What is **recommended**: The NOAA Small Component Course Refresher Test is **recommended** “not required” and can be a useful training tool for those who haven’t taken a NOAA Component Course in the last 5 years. [NCC Student Handbook](#)
2. What is **required**: The Small Boat Standards and Procedures Manual Policy test is required every 3 years in coordination with your PQS overview. [SBS&PM 4.1 Edition](#)
3. The best way to locate training on CLC is to type the letters **SBP** in the upper right corner search bar and hit the icon for training, don't forget to locate the **show more button** to view the complete list. [Link to CLC](#)
4. If a Small Boat Operator does not have access to CLC please request the test via email and I will send each test / answer key with detailed instructions to the **VOC** for completion.

NOAA Component Course Virtual “NCCV”

1. The NOAA Component Course is a onetime requirement that goes with you throughout your NOAA career. Due to COVID the NOAA Component Course has gone virtual “**NCCV**”. If a course is needed please contact paul.moreno@noaa.gov for scheduling and prerequisites. Scheduling is created upon Instructor availability, so please be patient with the timelines.
