

Small Boat Program Safety Alert - Update on SBP COVID Guidance

During the early months of the COVID pandemic, the SBSB issued practical guidance and risk management tools that were reflective of the prevailing understanding of COVID and its potential impact on small boat operations. Much has evolved since our last issuance on 26 March 2021.

The SBP safety notice of 26 March 2021 is no longer relevant and the board will not be offering summary COVID guidance for the small boat operations or management of personnel. The NOAA Small Boat community should refer to the existing DOC and NOAA COVID guidance for your small boat operations.

Refer to the OHCS [intranet site](#) for additional COVID information and for information on NOAA contractors/affiliates/visitors. Please continue to stay vigilant and abreast of CDC guidance on how to best protect yourself. Feel free to reach out to the Small Boat Program Office or your LOSBO should you have any additional questions or need any further support.
